1 Introduction

This is a user manual for Imago 2.0. For the latest version, please refer to the GitHub repository: <https://github.com/Devesh99/Imago>

2 Welcome screen

An image is loaded by default for you to start processing.

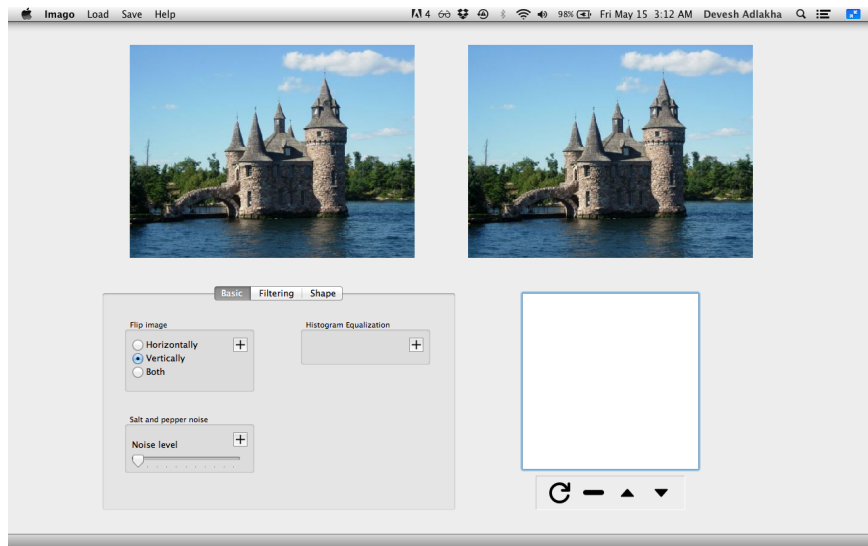

Figure 1: Welcome screen

3 Menu bar

The menu bar provides functionality to load input, and save the output.

3.1 About

Click on About Imago to see the version in use.

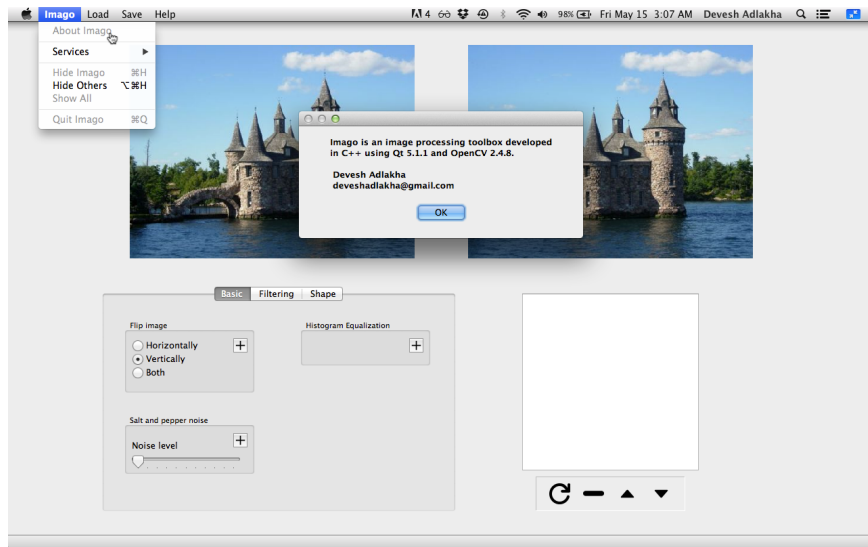

Figure 2: About Imago

3.2 Load

Select **Load** to load a new image, video, or web cam input. You may pause or resume a video or web cam playback using the **Pause/play** menu option.

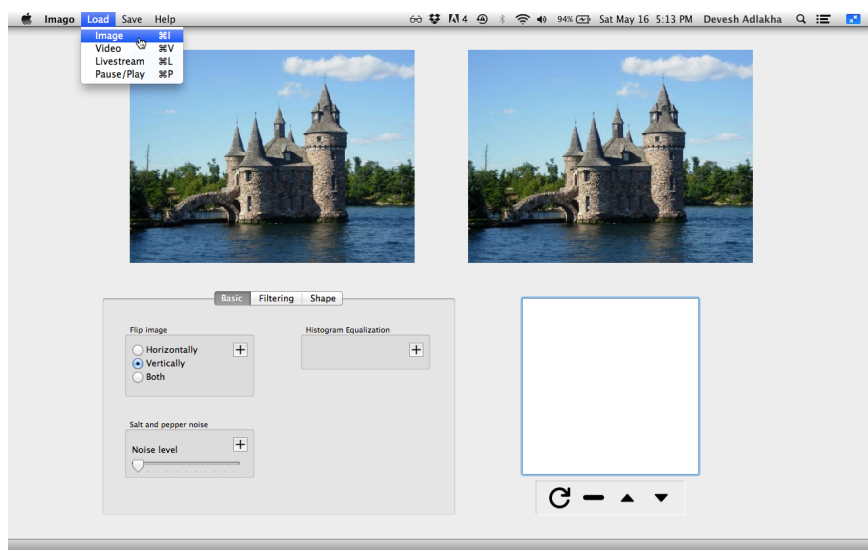

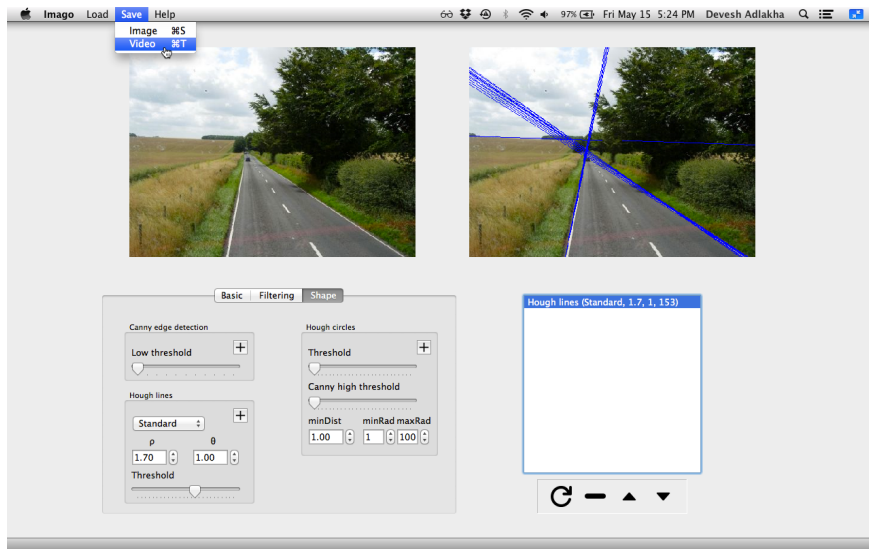

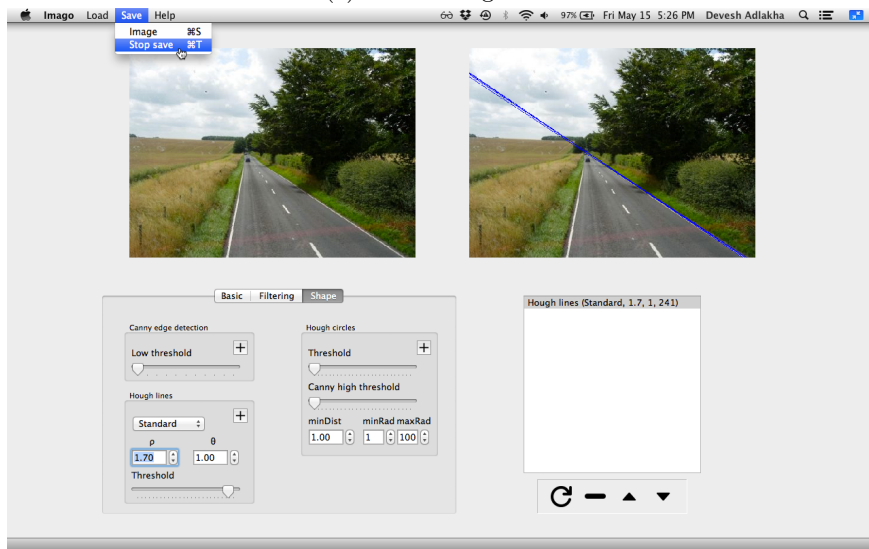

Figure 3: Load

3.3 Save

You may save the processing result as an image or video, for all input: image, video, and web cam. Stop the recording of a video by clicking **Stop save**.

(a) Start saving video

(b) Stop saving video

Figure 4: Save video

Saving as image saves one frame of the video or web cam. A video is saved with the following frame rate:

Video	same as input.
Web cam	15 <i>fps</i>
Images	1 <i>fps</i>

3.4 Help

You may search for options in the menu bar using the help search.

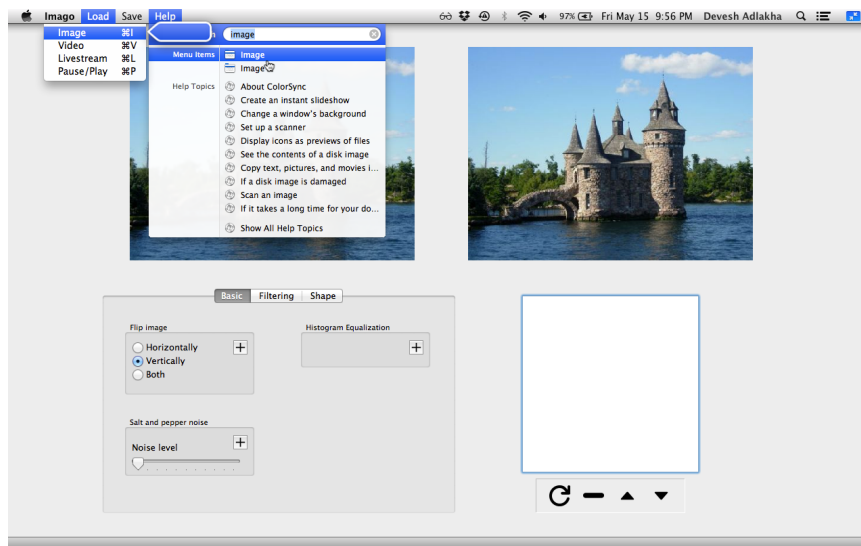

Figure 5: Help search

Only menu bar options are accessible through the help search.

3.5 User manual

Clicking `User manual` opens the user manual in your default web-browser.

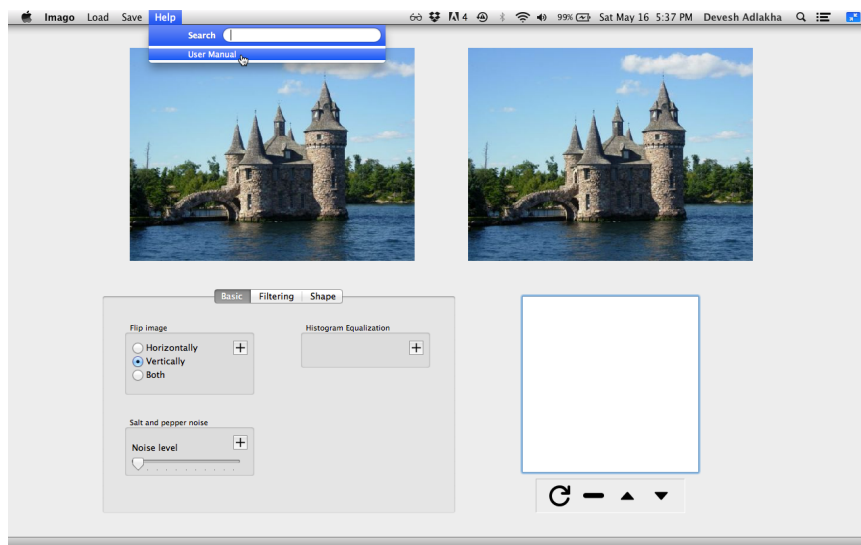

Figure 6: User manual

4 Basic

4.1 Flip image

Flip horizontally, vertically, or both.

The flip code is shown

5 Keyboard shortcuts

You may access the menu bar options and the process flow toolbar through the following keyboard shortcuts:

Mac

Linux

Windows
